

INFLATABLE RADAR PITCH

Equipment:

- | | |
|---|--------------------|
| 1 Red Bag with Inflatable Radar Pitch | 1 1.0 H.P. Blower, |
| 1 Radar Box | |
| 4 Corner Stakes & Ropes | 3 Tennis Balls |
| 1 12 gauge extension cord | |
| (4 Buckets and Tarp if on cement) | |
| \$75 cleaning fee IF returned Wet/Muddy | |

Set-Up

1. Remove any debris from the set up area that may damage the unit. Take inflatable from bag, unroll the unit. Please double check for overhead utility wires.
2. Insert cone on blower into the air shoot on the back side of the unit. Plug in blower to a secure 15 amp outlet. You may use ONE 50 ft extension cord of 12 gauge or higher.
3. After the radar pitch is fully inflated, stake the corners with the stakes provided.
*If on pavement, tie to the cement buckets provided.
4. Turn on the Radar Box by pushing the on button in the upper left corner of the box. It is possible that the box will turn off if not used for a period of time. Should this be the case, simply push the "On" button again.

Take Down

1. Make sure the area is clear and then unplug the unit.
2. After unit is fully deflated, fold sides in towards the center. Then roll from FRONT to back.

3. Insert inflatable radar pitch unit in bag.

\$75 cleaning fee if unit is returned wet/muddy

Inflatable Radar Pitch - Radar Box Instructions

The Radar Device is inside this box, open the box. Remove the device. (Note the batteries inside are EXTRA, device has batteries installed)

Remove the wing nut from the device

Place device on top of box - with lid open put wing nut on to secure device to box lid.

Turn device on, then click the mph button (mph will be illuminated on the front)
Place radar in the back corner of the inflatable

Reverse these to return the radar device.
