Requirements

Must have at least 2 adult attendants. Must remove glasses, shoes & sharp objects.
Must have a flat 25'L x 20'W area. (1) 20 amp 120 volt circuit.
This unit is 20'L x 12'W x 13'H

Contest

One participant will put on a Velcro suit (one that fits correctly), then steps up on the inflatable and jumps against the Velcro wall and sticks to it.

Attendant

It is not necessary to hit the wall with much force as they will just bounce off. Finesse is just as important. The participant then peels themselves off the wall. This is the spotter's job to make sure they do not come off the inflatable unit. Warn the participants that are coming off the wall too fast to slow down, they should step down off the inflatable carefully. There should only be one person on the wall at one time, no doubles on the wall.

Set-Up

If inside, place Velcro Wall against a wall free of any objects such as fixtures, basketball hoops or anything that might puncture the inflatable. If outside, place the Velcro Wall on a flat, grassy area and stake all 6 ties downs securely. Put stakes in right after you inflate it. Place the Velcro Wall where you want the back of the unit to be, untie and unroll towards the front. There are (2) Velcro flaps located on each side of the unit that need to be closed, be sure you get a tight seal so air does not come out. There are (2) chutes for the blower, you only need one. Choose the one that will be out of any traffic flow and is the closest to your power supply. Tie chute on blower securely. Tie the other chute you are not using by folding it up and wrapping the rope around several times - also tie securely. Plug in blower to a 120 volt 20 amp circuit, it should inflate in less than (5) minutes.

Take Down

Unplug the blower. When deflating, force back of unit to lay over the front of unit. Open all Velcro flaps and untie chutes. If outside, take all stakes out. Fold one side to middle, then other side to middle, then fold all the way over. It should be 4 ft wide. Roll from front to back, tuck the chute in and tie up.

Warning

You should not participate in this game if you have any of following conditions:

- Current or previous back or neck injury.
- Any respiratory conditions, including but not limited to asthma or bronchitis.
- Pregnancy
- Chronic knee or other joint conditions.
- Any heart or circulatory problems.
